Vizedge 1.0 TM
Pat. Pend.

“Know Thyself”

The old principle of living that you can find in all parts of the world.

To look at ourselves, we use mirrors.

To look at our business, we use Accounting and Finance.

All every elements in business are transformed into Accounting Financial parameters, figures, arranged upon proper principle basis, and then shown in the financial report.

Those arithmetic functions come from the principle equation,

Asset = Liability + Owner Equity, ($A = L + OE$).

That is why, in the balance sheet, Total Asset must be equal to Total Liability and Owner Equity, to make all figures completed and correct.

VizEdge 1.0 TM is the mirror of number that illustrates your business in Accounting and Financial figures.

This software is constructed especially for small business owner.

It is simplified and designed to be most practical to use.

Anyway, basic knowledge of Accounting and Finance, especially on technical terms and applications, is required in order to understand the meanings and relationships of all elements.

Small business owners would understand all meanings of the Accounting and Financial figures, then their combinations, to interpret the details of business picture.

Via Data Input Unit, they would be able to put in every business settings they would like to see, as business plans, and then business performance as financial report at the end of the Accounting period.

This function is simple, short and easy for user to operate and comprehend the result.

It is most suitable for all small business owners who are always in demand of time and assistance.

VizEdge 1.0 TM is able to answer your questions of management right at once.

Upon complete and correct accounting information, you can make decisions precisely.

This is the fundamental of realistic potential business management.

VizEdge 1.0 TM functions on the Microsoft Excel spreadsheet.

It is compatible to your working software such as Microsoft Words and Office 2000.

VizEdge 1.0 TM helps you do your business better.
